ABOUT

Within their many offerings, Oracle Hospitality's OPERA is a leading global provider of Property Management System (PMS) solutions to the hotel industry, allowing hotels to manage their guests across single or multiple properties.

HOW WE WORK

For many years For-Sight Guest CRM has integrated with Oracle's OPERA PMS and we are now Oracle Gold-level Partners.

For-Sight bridges the gap between a guest's details entering your hotel PMS, and their ensured second stay down the line through direct retention.

Currently, over half of our For-Sight users run OPERA PMS and have sent a combined 100,000,000+ emails this year.

HOW WE HELP YOU

With For-Sight ready to move your guest out of your PMS and into our CRM, we give you the freedom to up-sell and cross-sell your services, gather post-stay feedback, and entice them to come back for another stay.
